

ONE for Mining

Prospecting Review: 1 August - 1 September 2026

Sales-fit accounts, demand signals and the actions to take this week
Prepared for Steven Smith, Digitalrain | Compiled 1 September 2026

Executive summary

- **The month's dominant signal is a commissioning-and-ramp wave.** At least eight plants across seven countries are between first ore and nameplate right now (Skouries, Kurmuk, Mallay, Keliber, Platreef, Woodlawn, Mantoverde, Finniss). This is the exact window where ONE's fixed-scope diagnostic lands best: real data exists, the operating model is still fluid, and management is under visible pressure to hit plan.
- **Chile produced the clearest 'decisions lag the process' pain.** Lundin (Caserones, 19 Aug) and Antofagasta (Los Pelambres) both cut 2026 guidance after storm-driven outages, and Capstone reported lower Q2 recoveries tied to ore-character changes and flotation disruptions. Three named operators, one month, all with recovery/downtime language on the record.
- **The Nordic beachhead is strengthening.** Blue Moon Metals' Nussir plant (Norway) has an EPC in place with MOMEK Group, and Sibanye's Keliber (Finland) is in staged commissioning. Both sit within reach of the Engebø reference and give a credible 'proven next door' story.
- **Recommended focus: five accounts, two weeks.** Develop Global (Woodlawn), Capstone (Mantoverde), Eldorado (Skouries), Excellon (Mallay) and Blue Moon/MOMEK (Nussir). Each has a specific, dated trigger to lead with (see Section 3).
- **Two pipeline gaps need fixing before the next run:** the GitHub connector is failing (digests not publishing to SJS1001/PROspector) and the dedup folder is unreachable, so month-over-month dedup is currently manual. Contact enrichment (names/titles/LinkedIn) is blank across the board and should run against the 16 domains captured.

1. Month at a glance

Metric	Result	Comment
Qualified leads	15 accounts + 1 channel partner	Quality-filtered; excludes juniors, closures and pure price news
By track	Operating 10 Greenfield 5 Channel 1 Multiplier 0	Operating track (highest intent) dominates, as intended
Regions	Norway, Finland, Greece, Chile, Peru, Australia, South Africa, Zambia, Ethiopia	Nordics/Europe core covered; Canada and Brazil/Indonesia thin this month
Top pain codes	#3 Ramp-up (13) #4 Recovery (3) #5 Downtime (3) #2 Lagging decisions (2)	Lead with #3/#4/#5 language in every first touch
Reference account	Nordic Mining / Engebø	Q2: ramp lagging, separation/fines issues, liquidity squeeze. Excluded from leads; use as live proof point
Coverage caveat	1 nightly digest on file (1 Sep)	Earlier August digests were not readable; this review is rebuilt from public sources dated 1 Aug - 1 Sep plus carried signals from Jun-Jul that remain live

Key themes

- **Commissioning wave (pain #3).** Skouries (first ore crushed; first concentrate targeted Q3), Kurmuk (operations start Aug), Mallay (first concentrate), Keliber (staged mine/concentrator/refinery), Platreef Phase 1 (first concentrate sold), Kitumba (crusher commissioned).
- **Ramp-to-nameplate (pains #3, #4).** Woodlawn targeting 850 kt/y this quarter with recovery still climbing; Mantoverde Optimized ramp Q4 to ~45 ktpd; Peak expanding to 1.2 Mtpa with staged mill commissioning.
- **Downtime and guidance cuts (pain #5).** Caserones and Los Pelambres storm outages removed 35-55 kt of combined 2026 copper guidance; Capstone flagged a prolonged Q3 maintenance period and a January strike.
- **Greenfield pipeline (pain #1, design-stage).** Nussir (EPC awarded, production 2027), Youanmi (plant construction started), Finniss (restart FID, first production Q3), Escondida New Concentrator (US\$0.5B pre-commitment). Multiplier track produced no named fund this month; PE 'operational excellence' rhetoric only.

2. Priority actions - next 10 working days

Ordered by intent and timing fit for the 8-week diagnostic. Each action leads with the matched pain in the operator's own words.

#	Account / site	Trigger (dated)	Action and opening line	Owner / by
1	Develop Global - Woodlawn (AU, Cu/Zn)	Record June-qtr revenue; targeting 850 kt/y nameplate this quarter; recovery still rising (26 Aug market note)	Email + LinkedIn to GM Processing and COO. Open: 'You're pushing Woodlawn to nameplate while still tuning Cu/Zn recovery - ONE puts plant, lab and maintenance data in one model so drift shows up before it costs a shift.' Offer an 8-week diagnostic on Kate Lens transition data.	Steven / 5 Sep
2	Capstone Copper - Mantoverde Optimized (CL, Cu)	Q2 results: lower recoveries from ore-character change + flotation disruptions; prolonged Q3 maintenance; Q4 ramp to 45 ktpd	Target VP Operations Chile and Plant Manager. Open with their own words: 'operational disruptions to the flotation circuit.' Position diagnostic as pre-Q4-ramp readiness; Spanish-language one-pager.	Steven / 8 Sep
3	Eldorado Gold - Skouries (GR, Cu-Au)	First ore through crushing; wet/dry commissioning across grinding, flotation, tailings; first concentrate Q3, commercial Q4	Reach Commissioning Manager and VP Technical Services. Angle: build the unified operating model on commissioning data now so ramp decisions don't lag the process. European reference (Engelbø) is a strong fit.	Steven / 8 Sep
4	Excellon Resources - Mallay (PE, Ag/Pb/Zn)	First concentrate produced; controlled rate to optimise reagent, grinding and flotation; shipments Aug	Small single-site operator - ideal wedge. Target COO / Mine GM. Open: 'You're dialling in reagent and flotation at Mallay right now.' Fixed-scope, fixed-price pitch.	Steven / 10 Sep
5	Blue Moon Metals + MOMEK Group - Nussir (NO, Cu-Ag-Au)	EPC awarded to MOMEK; permits cleared; production late 2027	Two-pronged: Project Director at Blue Moon (design against vendor silos before commissioning) and MOMEK leadership (channel partnership; Engelbø is next door). Propose joint site visit to Engelbø.	Steven / 12 Sep

Secondary touches (this month, lower urgency)

- **Lundin Mining - Caserones and Antofagasta - Los Pelambres:** guidance cut after storm outages. Timing is sensitive; send a short, non-salesy note to Ops leadership referencing recovery-from-outage decision support, then follow up in October.
- **Sibanye-Stillwater - Keliber:** staged commissioning; EUR 200M ramp funding. Approach Keliber Oy plant management directly (Finnish-language intro if possible).
- **Ivanhoe - Platreef and Aurelia - Peak:** ramp/expansion in progress. Add to nurture sequence; revisit after next quarterly update.
- **Allied Gold - Kurmuk** (Ethiopia): operations starting Aug. Monitor for first-gold announcement, then approach.
- **Rox Resources - Youanmi, Core Lithium - Finniss, Sinomine - Kitumba:** greenfield/restart. Log for commissioning-window outreach in Q4.

3. Lead register (1 Aug - 1 Sep 2026)

Pain codes: 1 Data trapped in vendor silos | 2 Decisions lag the process | 3 Ramp-up not hitting nameplate | 4 Recovery / grade drift | 5 Unplanned downtime | 6 Too many dashboards

Operating / ramp-up (highest intent)

Company / site	Country - commodity	Domain	Signal	Pain
Develop Global / Woodlawn	Australia - Cu/Zn	develop.com.au	Restart ramp; record revenue; nameplate 850 kt/y targeted this quarter; recovery gains	3, 4
Capstone Copper / Mantoverde	Chile - Cu	capstonecopper.com	Lower Q2 recoveries (ore character, flotation disruptions); prolonged Q3 maintenance; Q4 ramp to 45 ktpd	3, 4, 5
Eldorado Gold / Skouries	Greece - Cu-Au	eldoradogold.com	First ore crushed; integrated commissioning; first concentrate Q3, commercial production Q4	3
Excellon Resources / Mallay	Peru - Ag/Pb/Zn	excellonresources.com	First concentrate; ~12 kt pre-commissioning; optimising reagent/grind/flotation	3, 4
Lundin Mining / Caserones	Chile - Cu	lundinmining.com	19 Aug: 2026 guidance cut to 120-130 kt after two storm-driven shutdowns and powerline damage	5, 2
Antofagasta / Los Pelambres	Chile - Cu	antofagasta.co.uk	2026 guidance cut to 625-655 kt on severe weather disruption	5, 2
Sibanye-Stillwater / Keliber	Finland - Li	keliber.fi	Staged commissioning mine > concentrator > refinery; +EUR 200M ramp funding	3
Ivanhoe Mines / Platreef	South Africa - PGM	ivanhoemines.com	Phase 1 concentrator ramp to plan; first concentrate sold	3
Aurelia Metals / Peak	Australia - Au/base	aureliametals.com.au	Expansion to 1.2 Mtpa approved; thickener commissioned Jun; tertiary ball mill Q1 FY27	3, 6
Allied Gold / Kurmuk	Ethiopia - Au	alliedgold.com	Operations start Aug 2026; first gold weeks after; 2027 guidance 240-270 koz	3

Greenfield / restart

Company / site	Country - commodity	Domain	Signal	Pain
Blue Moon Metals / Nussir	Norway - Cu-Ag-Au	bluemoonmetals.com	Plant EPC awarded (MOMEK); permits cleared; UG dev >2,000 m; production late 2027	1, 3
Rox Resources / Youanmi	Australia - Au	roxresources.com.au	FID Mar; final approvals post-June qtr; processing plant construction commenced; production 2027	1, 3
Core Lithium / Finnis	Australia - Li	corelithium.com.au	Restart FID, A\$307M funded; first production targeted Q3 2026	3
Sinomine / Kitumba	Zambia - Cu	sinomine.com.cn	Water pipeline and primary crusher commissioned Aug 2026	3
BHP / Escondida New Concentrator	Chile - Cu	bhp.com	US\$0.5B pre-commitment (Aug); 230-270 ktpa. Low wedge fit (multi-site major) - signal only	3

Channel and multiplier

Company	Country - role	Domain	Signal	Pain
MOMEK Group (MOMEK Services AS)	Norway - EPC	momek.no	Won Nussir plant EPC (civil/structural/mechanical/piping); ~600 staff, ~EUR 100M revenue	1
Multiplier track	-	-	No named fund/portfolio mandate surfaced. Generic PE operational-excellence trend only. Targeted sweep recommended (resource PE operating-partner hires)	-

4. Voice of customer - language to reuse in outreach

Verbatim phrases from operators, engineers and trade sources this month. Use them as subject lines and openers; they map directly to the pain taxonomy.

Quote	Maps to	Source
"operational disruptions to the flotation circuit" / "lower recoveries ... driven by changes in ore characteristics"	#4 Recovery drift	Capstone Copper Q2 2026 results
"the second severe storm disrupting recovery efforts and delaying planned return to full operations"	#5 Downtime, #2 Lagging decisions	Industrial Info, 19 Aug 2026 (Lundin/Caserones)
"tanks and sumps spilling over, pipes/chutes plugging, pumps/control valves operating at 100% most of the time and increases in unplanned downtime"	#3 Bottlenecked ramp, #5	Burns & McDonnell, concentrator debottlenecking
"treat the cause, not just the effect"	#2 Decisions lag the process	911Metallurgist, concentrator troubleshooting
"integrate enterprise systems like historians, computerized machine maintenance systems (CMMSs), and data from field operations"	#1 Vendor silos, #6 Dashboards	ScienceDirect digital-twin review
"staged commissioning ... to reduce ramp-up risk"	#3 Ramp-up	Keliber / Sibanye-Stillwater

5. Pipeline hygiene and process actions

Issue	Impact	Action	By
GitHub connector failing ('Incompatible auth server')	Digests and leads not publishing to SJS1001/PROspector	Re-authorise GitHub connector in claude.ai connector settings; re-run publish for 1 Sep files	Steven / 3 Sep
Dedup folder unreachable (~ID ocuments/Claude/Scheduled/mining-prospector)	No 7-day dedup; earlier August digests could not be read for this review	Connect the folder to the scheduled task, or move the digest store into the outputs folder	Steven / 3 Sep
Contact fields blank on all leads	No name/title/LinkedIn for first touch	Run Apollo enrichment on the 16 domains captured; prioritise COO/VP Ops, Plant/Processing Manager, Project Director	Steven / 5 Sep
Multiplier track empty	No fund-level leverage	Add a dedicated query set: resource PE operating-partner appointments, portfolio 'operational excellence' announcements	Next nightly run
Forum listening thin	No traceable last-48h operator posts	Add r/mining and AusIMM community feeds; run non-English queries (ES/PT) on LinkedIn	Next nightly run

Note on scope: signals for Nussir, Keliber, Platreef and Peak first surfaced in May-July 2026 and remain live; they are included because the accounts are still inside their commissioning/ramp window. Contact names were not captured from public sources this month and are intentionally left blank rather than inferred.
